#### 4. Open Questions:

4.1) What did you find most interesting about this seminar? What did you find most valuable?

- Absolutely loved this seminar! Learned so much and it is so fun!
- I absolutely loved going to the zoo and learning how to do some basic code. I really like the whole research process of coming up with an experiment, learning about my focal primate, and gathering/analyzing data.
- I loved how research was involved in this seminar. It was good to get some research experience in an independent setting.
- I loved the zoo trip! We talked about all of these primate species in class but it was just so mesmerizing to go and see them in person! I also liked that we got to pick our own research project and follow it through to the end. I felt like I was really leading my own research.
- I thought it was most interesting to get to do my own research. I had replicated research before, but conducting my own was very interesting and also the most valuable. This has generated a lot of new knowledge that I can put on my resume.
- She is an excellent instructor!
- The research paper and learning more about primates
- This seminar itself was very interesting in all aspects! To be honest, I never really was too interested in primatology. It is certainly a cool field, however I was never really too exposed to it and therefore it didn't really spark a lot of interest. However, this course definitely changed that. As the course went on and as I started learning more about the different aspects of primates (from their behaviours and how they interact to their social hierarchy) I began gaining a fondness for the field. Not only did I learn about a field that I wasn't too aware of, I also learned a lot about research and the process that occurs with it! For me personally, the most valuable I found from this course is related to all that we learned in research. However, the most interesting things were definitely the primates.
- gaining research experience was invaluable

4.2) In your opinion, how could this seminar be improved?

- I definitely wish that we had more time in this class to learn everything in more detail and at a slightly slower pace. It is incredibly hard to cover everything in the short amount of time we had, however I think that overall the course is structured very well. I think that the only thing that I would like to be added to the seminar is that, when working on the manuscript and its different sections, it might be nice to have a chance to have some peer editing done in class just so others can also give some feedback. I think other than that this course has been amazing to be a part of!
- I genuinely don't have many critiques for this class. I admittedly did not do many of the readings, however (or at least go too in-depth). I still felt like they helped however! I was just busy.
- I think drawing more connections between this seminar and the cluster course material would be super valuable
- I think the grading scale could be improved. The drafts carried too much weight and it made it hard to get a higher grade with a lot of effort.

- I think this seminar was very well balanced and created.
- Maybe shorter classes and meet more often? 3 hours is a LOT to sit through and meeting only once a week felt too little.
- N/A (2 Counts)
