**Question:** What are the best features of this course?

**Response Rate:** 100.00% (2 of 2)

- 1 Your expertise is fun to experience and I've enjoyed learning from you. 
- 2 I loved learning about such an interesting topic. Primatology may not be what I want to do beyond this class but I am glad to have learned about this world I barely knew about before. It is also exciting to have actually done research about primates. 

**Question: Do you have any suggestions for improvement of the course?**

**Response Rate: 100.00%** (2 of 2)

- 1 Nope! It can be intimidating and scary but you learn a lot 

I think the lectures about various forms of statical analysis and coding tools was unnecessary and went on for too long. I feel like subjecting an entire class to lectures about programs and data analysis that may or may not be reliant to their research was unnecessary. I think a brief description of them would be a good idea then allow students to schedule meetings during office hours to learn how to use the program. The second half of the class as is was very boring and some classes I found myself entirely disengaging with the lecture material. Even the things I was considering using in my project the presentation was difficult to find engaging. 

**Question: Do you have any additional comments on this course and/or the instructor?**

**Response Rate: 50.00%** (1 of 2)

- 1 I love your energy. You bring a real passion to class and it is so apparent that this class means a lot to you. I can see how excited you are to share your knowledge about this subject. I hope the concentration goes well. I wish you the best of luck. I am glad I had an opportunity to take a class with you this semester. Thank you.
